**Subject: 300-FF-2 Operable Unit Remedial Action Report, DOE/RL-2016-45 Rev. 0**

Mr. Guercia:

Thank you for the opportunity to review the subject document. EPA has reviewed the September 2016 report for the Hanford 300-FF-2 site and has no additional comments on the document at this time. It is the opinion of EPA that the document is ready for inclusion in the Administrative Record for the site.

I look forward to working with you and the State of Washington Department of Ecology to ensure that the Hanford Superfund Site will be protective of human health and the environment. Please contact me at (202) 564-0527 with any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Benjamin Simes", is written over a series of horizontal blue lines.
